

3-8-19

①

Dear Mr Fergus Nolan,
Honestly I don't know
who I can trust about my
case because I've always
told nothing but the truth
from the beginning of the
events of that night. I
never could understand how
telling the truth would get
me slapped around and punched
on for no reason. The
truth of the matter is what's
real but no one wanted to
believe what I was telling
them and that what I was
saying was all a lie, something
I had made up to get out
of killing an officer is what
the two detectives interviewing
said. These are the same
two that signed the statement
papers that I gave them.
I never signed a form giving
up my rights or any thing
other. Any documents you
see or have are falsified

papers that were my main concern, I've filed all kinds of papers to obtain the so called affidavits but never got any of them. I've also asked for the affidavits of the state witnesses and never gotten those. I have newspapers that say one things and the many news channels saying something totally different.

The truth is before your eyes and now some has finally seen one of the things that I and every one else has talked about for over twenty plus years. The hand cuffs were cuffed behind me and two set of cuffs were used not the cuffs that are in evidence either the cuffs where made like this

not like

this

cuffs on because it hurt to move I still have the cuts or scars

I could not move with the cuffs on because it hurt to move I still have the cuts or scars

on my wrist from being cut cause they were so tight.

I could not move from side to side in any kind of way. The reason being is because I throw them into the trash can behind a laundry mat where they wash clothes it use to be a corner store back in the late 80 early to mid 90. There was nothing in the car when I left it so where did the gun come from. I have many questions about many things that were not done right in trial and before in preliminary hearing that the judge let go on without dismissing it for improperly mishandling the evidence.

I filed multiple complaints against Brett Stein and nothing was done. A lot of my paper work was destroyed while at NWEX because of me going back & forward to Special Needs because of a bad hip.

that needed to be placed. I was on disability on the streets how could I do what they said I did. I was in pain on a daily basis, taking 800 to 1600 miligrams for the pain. None of my health issues were of concern to any of them they just kept saying I did shoot this lady and I didn't how could I when my hands are behind me, with limited movement. The gun, wow how can there not be any prints matching any one, let alone the prosecutor pick it up with his bare hands in preliminary hearing and my lawyer never said a word.

Dad is good and he will guide you with the truth always.

We've all prayed for this day to come, for walking the righteous path of truth & honesty will always lead to the right person and the right place in time.

I think you should meet my mom & pastor if this is true.
